the 1999 international workshop on interactive distributed multimedia systems and telecommunication services idms in toulouse is the sixth in a series that started in 1992 the previous workshops were held in stuttgart in 1992 hamburg in 1994 berlin in 1996 darmstadt in 1997 and oslo in 1998 the area of interest of idms ranges from basic system technologies such as networking and operating system support to all kinds of teleservices and distributed multimedia applications technical solutions for telecommunications and distributed multimedia systems are merging and quality of service qos will play a key role in both areas however the range from basic system technologies to distributed multimedia applications and teleservices is still very broad and we have to understand the implications of multimedia applications and their requirements for middleware and networks we are challenged to develop new and more fitting solutions for all distributed multimedia systems and telecommunication services to meet the requirements of the future information society

at a time when computers are more widespread than ever intelligent interactive systems have become a necessity the term multimedia systems refers to the coordinated storage processing transmission and retrieval of multiple forms of information such as audio image video animation graphics and text the growth of multimedia services has been exponential as technological progress keeps up with the consumer s need for content the solution of one fits all is no longer appropriate for the wide ranges of users with various backgrounds and needs so one important goal of many intelligent interactive systems is dynamic personalization and adaptivity to users this book presents 37 papers summarizing the work and new research results presented at the 6th international conference on intelligent interactive multimedia systems and services iimss2013 held in sesimbra portugal in june 2013 the conference series focuses on research in the fields of intelligent interactive multimedia systems and services and provides an internationally respected forum for scientific research in related technologies and applications

this open access book was prepared as a final publication of the cost action ic1304 autonomous control for a reliable internet of services across the book contains 14 chapters and constitutes a show case of the main outcome of the action in line with its scientific goals it will serve as a valuable reference for undergraduate and post graduate students educators faculty members researchers engineers and research strategists working in this field the explosive growth of the internet has fundamentally changed the global society the emergence of concepts like soa saas paas iaas naas and cloud computing in general has catalyzed the migration from the information oriented internet into an internet of services ios this has opened up virtually unbounded possibilities for the creation of new and innovative services that facilitate business processes and improve the quality of life however this also calls for new approaches to ensuring the quality and reliability of these services the objective of this book is by applying a systematic approach to assess the state of the art and consolidate the main research results achieved in this area

this book is aimed at scientists technologists engineers and undergraduate and graduate students involved in analytical and process biochemistry and biotechnology it reviews the potentialities of light emitting reaction associated with the sensor approach the book introduces the concepts of sensors and biosensors and places bio and chemi luminescent sensors in the general context of biosensors it then briefly describes luminescence phenomena and provides some basic knowledge necessary for understanding and exploiting light emitting reactions these luminescence reactions important from an

analytical standpoint are described also the applications of bio and chemi luminescence which make use of immobilized reagents are explained finally there is discussion of bio and chemi luminescent sensors most of them including fiber optics
